

Technology-Assisted Review (As a Service)

Fast and reliable document review and production

With H5's advanced technology and expert search, document review doesn't have to be the case team's burden. Let H5's experts take the reins with a hybrid TAR process, executed by search experts for legal experts.

H5 TAR PROCESS: KEY BENEFITS

H5's unique, expert-driven TAR process and proprietary search platform pair perfectly to provide a highly accurate first-pass document review.

→ **Reduce review time and expense with a battle-tested, highly accurate TAR process.**

Statistical algorithms and expert-designed linguistic models identify potentially responsive, confidential, privileged and key documents, with high speed and accuracy.

→ **Attain maximum cost efficiency with superior data reduction techniques to reduce volume.**

Dedicated processing throughput - one terabyte per day, global de-duplication, culling and filtering techniques reduce non-responsive volume.

→ **Flexible TAR process adapts easily to change as the matter evolves, without costly re-review.**

New information? No problem. Fast and highly scalable process, regardless of document volume, does not require starting over when needs change.

→ **Host data on the platform of your choice.**

H5 supports hosting on any platform. Relativity-based hosting enables access to H5's award-winning H5 Matter Intelligence® and H5 Matter Analytics®.

WHY H5?

H5 has consistently shown, that our process, professionals and products are trustworthy, reliable and top of the line.

→ **Broad domain and legal experience makes knowledge transfer easy.**

Benefit from H5's years of experience in litigation and investigations for most corporate verticals—from negotiation of production requirements (even with the government)—all the way to production.

→ **Expert and reliable project management throughout the process reduces time and stress.**

Experienced professionals manage and are available at every stage of the review and production process.

→ **Advanced tools, technologies and products keep H5 at the cutting-edge.**

H5 has an arsenal of tools and works with Nuix, Relativity® and other industry leaders to provide the best possible services.

H5 FOUND DOCUMENTS WE MIGHT

never have found, in a fraction of the time. If there's a smoking gun, H5 will find it.

– AmLaw 100 Law Firm Partner

H5's High Quality TAR Cut \$2 Million and 18 Weeks for Fortune 500 Company

SITUATION: A Fortune 500 conglomerate engaged H5 to perform a review for production in a pending matter.

After H5 delivered the first set of responsive and privileged documents, the client's attorneys conducted their own pre-production review. Due to the high accuracy of our assessments, the attorneys determined their planned document-by-document review of subsequent deliveries was no longer necessary.

Instead, they reviewed small test samples of each result set, continuing to find the same accuracy. By reducing the number of documents that the client's attorneys had to look at, we brought huge efficiencies to the review, reduced the time to production by 18 weeks, and saved the client over \$2 million.

High-Speed Review in 8 days for Media Conglomerate

SITUATION: A national law firm representing a media conglomerate engaged H5 to review 400,000 documents before a court-ordered production date. Through various unavoidable client delays, an expected 60-day review cycle was shortened to two weeks.

Despite this unexpected challenge, H5's team of linguists, subject matter experts, and researchers found 80% of the responsive documents in the collection within eight business days—in time for the court-imposed deadline.

Large HSR Second Request for Health Insurer Completed On Time, Under Budget

SITUATION: Fortune 100 health insurance company needed to collect and review over 4 terabytes of documents and produce to the DOJ to enable on-time completion of its strategic M&A effort.

H5 processed the 4 terabytes of native client data, defensibly reduced the volume by 88%, and used technology-assisted review to assess the remaining documents for responsiveness, potentially privileged, and 10 issue topics. The responsive population was hosted by H5 in Relativity for the client to conduct a streamlined second pass privilege review in time to meet production deadlines.

Expert Culling Saves Over \$1 Million in Review Costs for Internal Investigation

SITUATION: A national law firm conducting an internal investigation on behalf of its Fortune 500 client was faced with a collection of over a million documents. Because of tight timelines and a lean review team, the firm needed to minimize the amount of information for review.

Through expert culling based on advanced linguistic strategies, H5 reduced the collection by nearly half, saving the client over \$1 million, while minimizing the risk of eliminating relevant documents. From there, our search experts identified a subset of documents for further review and prioritized 500—affording the law firm time to conduct a document-by-document review and find the critical information the client had requested.

Hosting in Relativity®?
